**Panorama Antennas announces a new range of high performance multi-band M2M antennas.**

**LONDON – UK – 8 July 2008 – Panorama Antennas, the antenna and RF Solutions Company announced the availability of a new range of high performing M2M antennas for embedded device applications. The ‘TC’ antenna range represents an effective and cost efficient solution to the problem of combining multiple transition methods in a single device.**

When space, cost and lack of ground plane are an issue the ‘TC’ range comes into its own. Industry standard UFL connectors mounted on the board make it extremely adaptable. The pre-drilled mounting holes leave the installer with the freedom to position the antenna wherever it needs to go.

“Panorama Antennas is a leader in providing high performance antennas for the global wireless communications market,” stated Christopher Jesman, Managing Director. “With the new range of ‘TC’ antennas, we can offer a broad range of standard off-the-shelf antennas for Quadband GPRS, 3G UMTS, 2.4GHz WLAN, Bluetooth and ZigBee without compromising on performance, making it an ideal one-size-fits-all product for metering systems, equipment monitoring and any other applications involving the transmission of data over cellular networks.”

For additional information on the new ‘TC’ range or to order samples, call Panorama Antennas or visit <http://www.panorama-antennas.com>. The new ‘TC’ range is available globally from 8 July 2008.

About Panorama Antennas Ltd:

Panorama Antennas, a family business now in its 3<sup>rd</sup> generation, is a leading design and manufacturer of antennas for radio communications. Established in London in 1947, Panorama started life as a company manufacturing consumer products. By 1952, buoyed by huge demand for TV's in the UK, Panorama had moved into the manufacturing of components for televisions including antennas.

Today, Panorama is a major producer of antennas for telecommunications and electronics companies around the world, employs over 50 persons and has 8 overseas sales offices.
