IoT & M2M

Guide for 169MHz, 433MHz & 868/915MHz Bands
Over 70 Years of Experience

Panorama Antennas is a privately owned family business, now in its third generation, and is a leading designer and manufacturer of antennas for wireless communication. Established in London in 1947, Panorama started life as a manufacturer of consumer products and buoyed by huge demand in 1952, began manufacturing TV components and antennas. With the transistor radio trend of the 1960s, Panorama’s expert knowledge swiftly led us into the manufacturing of communication antennas.

Throughout the 70s and 80s, Panorama evolved to become the first specialized communication antenna manufacturer in the UK, developing a range of cellular antennas to coincide with the launch of the mobile phone network in Britain. 1990 was a year of huge change as Panorama found itself revolutionizing cellular glass mount antenna technology, filing a patent application for the first ever solid state coupling circuit. Through creating a new benchmark for quality in the production of components and leading technology development, Panorama has grown side by side with the cellular telecommunications industry.

Today Panorama produces antennas for the world’s leading communication companies and has grown to include over 80 staff in 8 international sales offices, as well as operating 3 fully owned subsidiaries. Manufacturing, design and development are located in London less than a mile from the original factory. Our network of international sales representatives means that all customers get the attention and advice they require, providing local support on a global scale.

Antennas For Next Generation

Panorama’s constant cutting-edge research ensures that our antennas meet the demands of the very latest technology. With over 70 years’ experience in delivering world-class antenna products, Panorama’s current product range reflects our unparalleled expertise in providing high-quality performance antennas.

Quality As Standard

Quality Assurance

In 1989, Panorama Antennas became the first antenna manufacturer in Europe to gain ISO 9000 certification. Panorama currently holds the ISO 9001-2015 certificate for quality assurance.

Environmental Management System

Panorama has attained ISO 14001:2015 International standard for effective environmental management system (EMS).

Patents

Panorama Antennas currently holds several patents and registered designs both in Europe and worldwide.

RoHS Compliance

All products that Panorama Antennas manufactures are 100% compliant to 2015/863 RoHS 3 European legislation which is due to replace RoHS 2 regulation on 22nd July 2019. Advanced “in-house” technology enables Panorama to test supplied materials at the factory “goods in”, ensuring that non-compliant material is not used in production.

REACH

REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals, EC 1907/2007) is the European Union’s chemical regulation that came into force on 1 June 2007 and will be phased in over an 11 year period (until 2018). Panorama Antennas wholeheartedly supports the objective of REACH to enhance public health and safety and the protection of the environment. Panorama is committed to meeting REACH requirements and can provide information about substances in accordance with the requirements.

Associations

Panorama Antennas is currently a member of the following professional associations:

- Federation of Communication Services
- TCCA (TETRA & Critical Communications Association)
- British Safety Council
- B-APCO (British Association of Public Communication Officers)
Wall Mount 169MHz

FEATURES

- Robust low profile design
- Bracket mount (Wall/Mast)
- Tuned to 169MHz

The LPBV-169 antenna is a low profile, fixed site VHF antenna. Easy to install, its robust design ensures it is weather and vandal resistant as well as being a cost effective antenna solution.

Mini Magnet 169MHz

FEATURES

- No hole installation
- Magnetic mount
- Tuned to 169MHz

For rapid deployments or when there are installation constraints, the MAR-169 is a small and lightweight VHF antenna solution. Cost effective and low visibility.

Bracket Mount 169MHz

FEATURES

- Robust low profile design
- Bracket mount (Wall/Mast)
- Tuned to 169MHz

The LPBV-169 antenna is a low profile, fixed site VHF antenna. Easy to install, its robust design ensures it is weather and vandal resistant as well as being a cost effective antenna solution.

Magnet Mount 169MHz

FEATURES

- No hole installation
- Midi magnet mount
- Tuned to 169MHz

For temporary or permanent mounting, the MD-168 is a durable magnetic mount antenna solution that is tuned to 169MHz.

MAR-169-2SP

MD168-5SP
**Offset Dipole 169MHz**

**FEATURES**
- Easy to install
- Suitable for indoor or outdoor use
- Tuned to 169MHz

A lightweight, compact and efficient antenna, the ODP-H7 is an extremely versatile solution that can be wall or pole mounted.

**Mast Mount 169MHz**

**FEATURES**
- Mast or pole mountable
- Temporary or permanent installation
- Tuned to 169MHz

A unique and highly efficient antenna solution for certain applications. This base station type antenna is weather resistant, durable and ideal for any pole or mast mount installations.

**Helical Antenna 169MHz**

**FEATURES**
- Durable
- Fully over-moulded
- Tuned to 169MHz

Durable and compact, our range of helical antennas for devices are fully over-moulded in high quality plastic and tuned for optimal performance.

**¼ Wave Antenna 169MHz**

**FEATURES**
- Durable
- Over-moulded stain relief
- Tuned to 169MHz

Our range of ¼ wave antennas for use with terminal radios and telemetry devices are ideal if you require a highly efficient, flexible and robust antenna solution.

**Bracket Mount 433MHz**

**FEATURES**
- Robust low profile design
- Bracket mount (Wall/Mast)
- Tuned to 433MHz

The LPBU-433-NJ antenna is a low profile, fixed site UHF antenna. Easy to install, its robust design ensures it is weather and vandal resistant as well as being a cost effective antenna solution.

<table>

**Half-Wave 433MHz**

**FEATURES**
- 5dBi Gain
- Ground Plane Independent
- Flexible Whip

The HM-433 and PUG-433 are robust yet flexible 5dBi antennas, perfect for UHF telemetry devices without a ground plane, that also require more gain.

**Smart Metering | M2M | Industrial IoT**
Low Profile Dome 433MHz

**FEATURES**
- Rugged
- Heavy duty
- Ground-plane independent

A high performance, robust antenna solution ideal for any application that requires a low profile UHF antenna that is easy to install and durable.

Mast Mount 433MHz

**FEATURES**
- Mast mount
- Rugged
- Tuned to 433MHz

A unique and highly efficient antenna solution for certain applications, this base station type antenna is weather resistant, durable and ideal for any pole or mast mount installations.

Offset Dipole 433MHz

**FEATURES**
- Easy to install
- Suitable for indoor or outdoor use
- Tuned to 433MHz

A light weight, compact and efficient antenna, the ODP-433 is an extremely versatile solution that can be wall or pole mounted.

Bracket Mount 433MHz

**FEATURES**
- 4dBi Gain
- Improves Range
- Wall or Mast mount options
- Indoor or Outdoor

The ideal antenna solution for a fixed radio terminal, the BM433 is easy and simple to install, discrete, and very reliable to offer improved coverage performance for your radio.

Wall Mount 868/915MHz

**FEATURES**

- Discrete low profile design
- Vandal resistant
- 868MHz or 915MHz

The LPW antenna is an easy to install, discrete and robust antenna in a sleek housing which is weather resistant. This high performance product is also a cost effective antenna solution.

Panel Mount 868/915MHz

**FEATURES**

- Robust low profile design
- Vandal resistant
- 868MHz or 915MHz

The LPBE range is an extremely popular, low profile, cost effective antenna solution. With a robust design, its a great weather and vandal resistant fixed site antenna solution.

Ultra Low Profile 868/915MHz

**FEATURES**

- Ultra low profile antenna
- Mounting bush or screw fitment
- Robust, tamper proof design

The LPAB range of antennas combine ergonomic style along with sophisticated engineering. The low profile housing gives a high degree of vandal resistance making it perfect for vending machines or other telemetry devices in exposed locations that require reliable communications.

Low Profile 868/915MHz

**FEATURES**

- Low profile puck design
- Built for IoT applications
- Covers both 868 & 915MHz frequencies

Designed for IoT applications, the antenna utilises a ruggedized low profile housing. A ground plane independent antenna that has cost at the heart of its design.
### Magnetic Mount 868/915MHz

**FEATURES**

- No holes installation
- Cost effective
- Magnetic base

As a temporary or permanent, no-hole discrete antenna solution for internal or external use, the product is ideal for many different applications especially when cost is a sufficient factor.

<table>

### DIN Rail Mount 868/915MHz

**FEATURES**

- Easy ‘click’ fit
- EN50022 Mount
- Supplied with right angle FAKRA D

The perfect solution for certain IoT scenarios, this ground plane independent, highly efficient rail mount antenna is a unique design that’s also very easy to install.

- Part no. : IN2216
- Cable : 1m/3ft
- Connector : FAKRA D

### Internal 868/915MHz

**FEATURES**

- 868/915MHz 2dBi
- Simple adhesive pad fitment
- Can be fitted on glass or plastic panel

The EF-BC3G-26 antenna is a low cost single 4G/3G/2G product that can be fitted on any non-conductive surface. It is typically fitted on a window.

- Part no. : EF-BC3G-26-3SP
- Cable : 3m/10ft
- Connector : SMA Plug

### Half-Wave 868/915MHz

**FEATURES**

- 4dBi Gain
- Ground Plane Independent
- Flexible Whip

The HM-S5 and HM-D are robust yet flexible whip antenna products perfect for telemetry devices with no ground plane that also require more gain.

<table>

Rapid Deployment 868/915MHz

FEATURES
- Clip mount design
- 4dBi Gain
- Simple installation
- Half Wave antenna

The CD800/900 antenna features an end fed half-wave antenna element with a spring clip and a fully over-moulded cable for weatherproofing and resilience.

Mast Mount 868/915MHz

FEATURES
- Mast mount
- 5dBi Gain
- 800MHz/900MHz

A unique and highly efficient antenna solution for certain applications, this base station type antenna is weather resistant, durable and ideal for mast mount installations.

Wall Mount Base Station 868/915MHz

FEATURES
- 6dBi Gain
- Wall mounted with brackets supplied
- Robust construction

An omni-directional, 6dBi gain antenna solution that can be wall mounted to offer improved coverage. Weatherproof and supplied with mounting brackets, it’s an ideal IoT antenna.

Bracket Mount 868/915MHz

FEATURES
- Cost effective wideband LTE / Cellular
- Easy installation
- Wall or Mast mounting
- Compact design

The B4BEE antenna is fully weather proof and is omni-directional, providing simple installation in an elevated or external location to achieve optimum network signal.
