

MNMOM[X]

- Panel mount antenna base
- Suitable for NMO type whips
- Moulded coaxial cable connection
- Stainless steel earthing teeth

The Panorama MNMOM is a rugged, high quality 3/4 inch panel mount antenna base and is compatible with NMO style antennas.

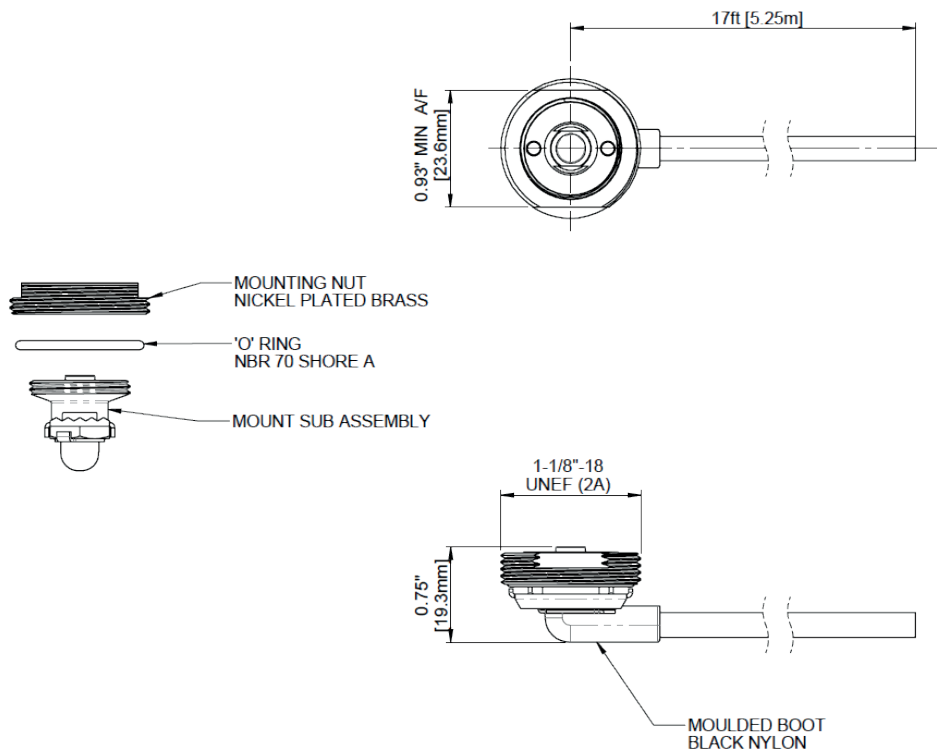

The base is constructed from nickel plated brass to prevent corrosion and the earthing teeth are stainless steel in order to maintain a low resistance earth contact during the service life of the installation.

Supplied with high quality CS23 (RG58) cable, the MNMOM range is perfect for a hole mount installation.

Various lengths and connector configurations are available.
